AHD 960P(1080P optional); 1/2.9inch cmos sensor GC2053 0.1lux 45db signal-to-noise ratio, F2.0 aperture; 3.6MM lens, 12V input; Metal shell.

Install the front and rear parts of the car, and use white light night vision to fill the light, so as to ensure that the light-filled parts are not blocked and evenly distributed on the surface of the car. Pay attention to the installation position to ensure that the middle seam is centered after monitoring the surface of the car and sealing the cover. Need protective cover
