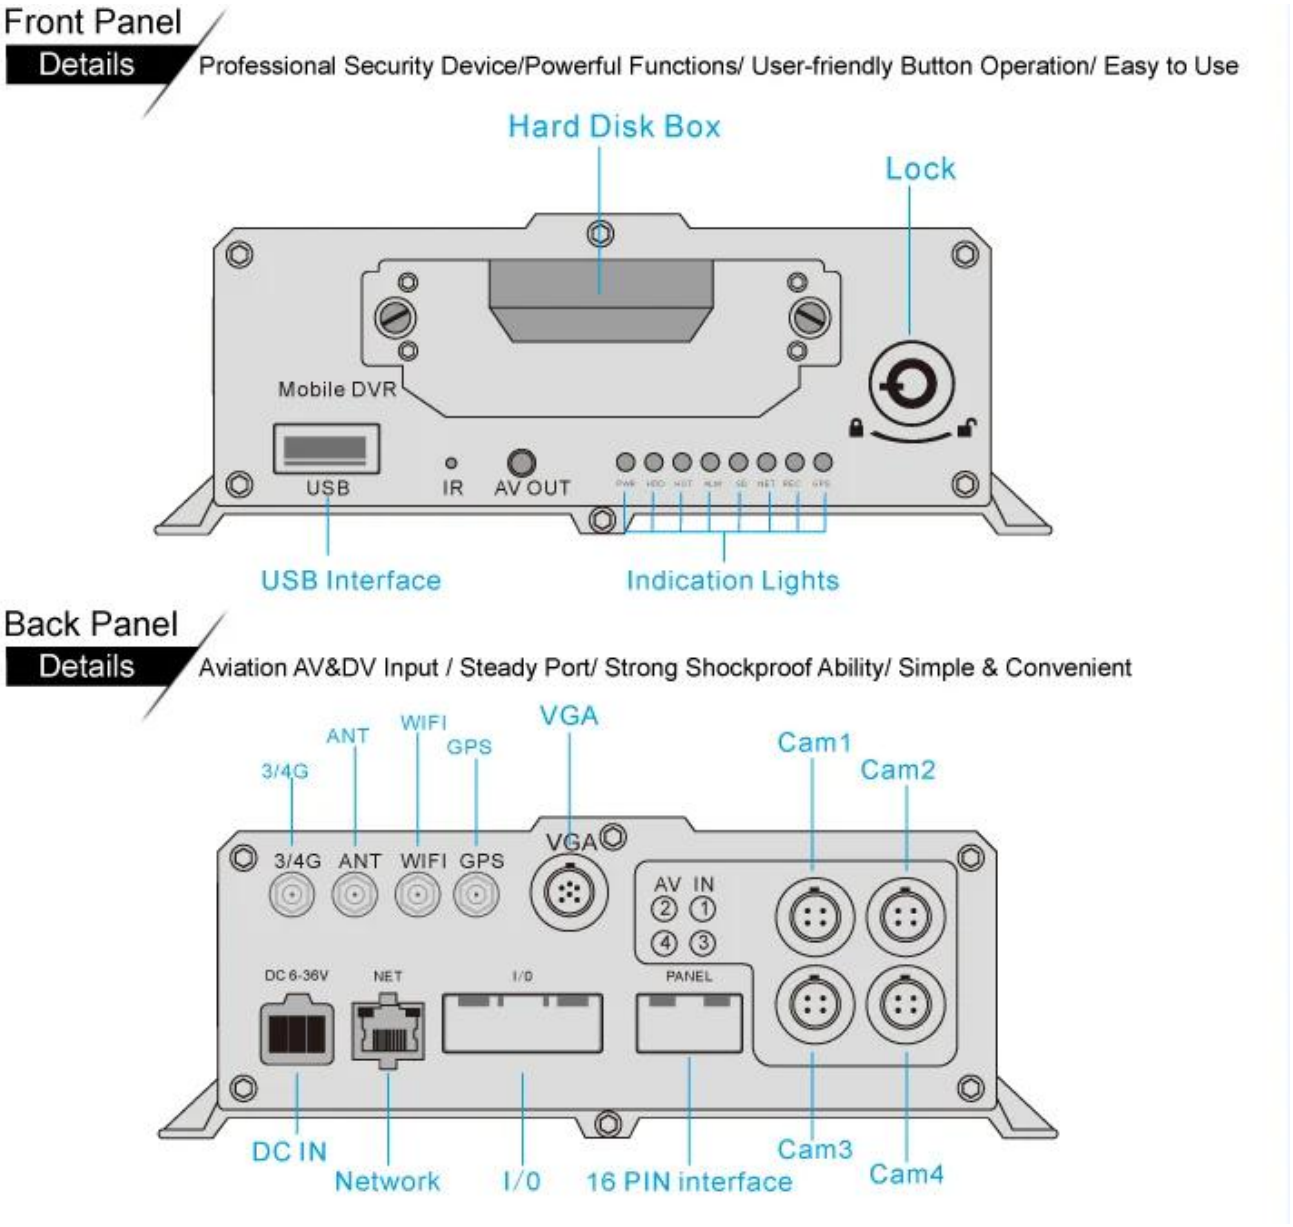
High Quality 4 channel 1080P Hard Disk MDVR

Products Description

Resolution	4X 1080P AHD+ 1X 1080p IP Full real-time recording
Module	G-Sensor built in, GPS /3G/4G /WIFI Optional
Storage	Support 1 X 2TB Hard disk + 1 X 128 GB SD card
Alarm I/O	8CH Alarm input, 2CH Alram output
ACC Delay	10 seconds delay pow-off for data protection
Voltage	8V-36V Wide range voltage power supply

Front side and Back side

Structure



Product Quality

Integrated industrial-level battery inside. When vehicles encounter collision, MDVR supports 10s delay recording for data protection.

Industrial rubber bracket to prevent the collision of hard disk in the process of driving, to protect the data security of hard disk. Exclusive damping technology to build military grade quality.

Choose the electronic material of industrial grade, ensure the life of the component and the stability of the whole machine.

Application case

Example 1---For law enforcement car/police car with PTZ camera

Example 2---For school bus

Management platform

RMVS is a system of centralized management and monitoring of all kinds of vehicles based on wireless network. Perform Real-time Monitoring, GPS tracking, Video storage, Vehicle scheduling, Intercom and Alarm, etc. Contact salesperson to know more function of RMVS.
